Attention Mothers and Fathers!

Robust and sturdy boys and girls-the result of this wonderful energy-producing food

HERE is a statement by an authority on nutrition that gives the reason why there are millions of Karo users all over the country This expert says "Karo is one of

the greatest of all energy-producing foods. It brings strength and energy to the boys and girls that need lots of strength and energy for studying and playing and growing "

> An important question! What is Dextrose?

You cannot live long without Dextrose Most foods you eat—such as bread starchy vegelables and all forms of sugar—have to be changed into Dextrose before your eys ton can use them as energy foods.

Karo contains a large percentage of dextrose—a completely directed nugar.

So Karo may almost be eald to be a predigested food. These are accentificacts supported by the very highest medical and and food authorities. Send for the free booklet mentioned below, and read all the facts.

To have lots of energy strength and endurance use plenty of Karo—on cakes or waften or also a dollclous spread on bread Many prefer it for stewing dried fruit and prunes. And it makes perfectly wonderful tuffy fudge and caramels.
